NEIGHBORHOOD NEWS From ERIC DOBIS

Sarasota Drain Commission is repairing the storm drain between 476 and 478 Pendleton Place, as we had a sink hole between Sandy Henderson's and our place. The seal between two of the drainpipes has failed. They cut a section out of the top of the pipe to allow access. They patched the seal area and reinstall the cutout with sealant around it. For those wondering, the drainpipe is about 3 to 4 feet below grade. I expect they will complete it today. It ended up being a leaking join in the storm drain that runs from the road to the lake behind us. See Photos Below.

You Are Cordially Invited to
